

ABOUT

Western Allied has become an industry leader for over 55 years through our commitment to **exceptional customer service**. We are owned and operated by the industry's most highly trained and qualified personnel.

Western Allied is a full-service HVAC mechanical contractor providing **retrofit and replacement**, tenant improvements, preventative maintenance, service and repair, construction for new and existing buildings, indoor air quality, ventilation and filtration analysis and improvement, design engineering, EPA and SCAQMD Refrigerant Leak Compliance Testing.

We service a full range of equipment including: chillers, boilers, pumps, packaged and split system AC units, cooling towers, air handling units, vane axial fans and more.

DO YOU HAVE OLDER SYSTEMS THAT NEED REPLACING?

IS THE AGE AND INEFFICIENCY OF YOUR EQUIPMENT RAISING YOUR COSTS AND PUTTING YOU AT RISK OF SYSTEM FAILURE?

If so, Western Allied's experienced, qualified team of engineers and technicians can customize a retrofit or replacement plan that works for your business needs and budget.

With Western Allied as your trusted partner for HVAC retrofits and replacements, you can expect:

- » Correct selection and replacement of HVAC equipment and systems.
- » Improved web access and early warning of problems via direct digital controls (DDC).
- » Full DDC capability, including installation, maintenance, off-site monitoring and adjustment services via internet and telephone modem.
- » Tenant Improvements including additional control zones and thermostats.

RETROFIT & REPLACEMENT CAPABILITIES:

Full analysis of space cooling and heating requirements.

Strategy for potential integration of existing equipment with new system elements to reduce costs.

System removal, disposal, new construction and installation capabilities.
